“ *To the Moon Family;
We wanted to take the time to express our condolence to your family. As we all know, these are indeed very difficult times for your family. We know that many will offer words of encouragement to the entire family. We would like to do likewise. With our own strength, this time of distress would be difficult for people to endure. But with God's help and encouragement we can. His word the bible tells us much. The Genesis account explains the wayward course that Adam chose to take and the end results of his action. From that course the human family suffers from sin and death. Our Creator has promised us that his Son Jesus would take the necessary steps to correct these things that we see today. God wants everyone to understand this. AT John 5:28-29, his son tells us that the time is coming when a marvelous miracle will take place. It is the resurrection of human life. Just think; this will be a time for you to see your love one again. Why not allow the bible to encourage you with these wonderful trues.*
